

Olu Oladipo

Web Engineer

* * *

Web Engineer supporting and optimizing 200+ production websites across legal, healthcare, and other regulated industries. Develops scalable web applications and content platforms using WordPress, React, and Next.js while solving complex infrastructure issues, leading migrations, and improving performance, reliability, and technical SEO. Creator of OluOps, an internal operations platform for website monitoring, diagnostics, approvals, and workflow automation.

EMPLOYMENT HISTORY

Web Engineer – Full-time

Matador Solutions, Venice, CA — Jul 2024 – Present

- Build and maintain custom WordPress themes and plugins using PHP and ACF for legal and healthcare clients across 200+ production websites.
- Configure and troubleshoot lead-capture workflows across WPForms, Gravity Forms, Contact Form 7, Zapier, email notifications, scheduling tools, and downstream CRM or intake systems.
- Deliver feature enhancements, production fixes, and ongoing maintenance in a high-volume agency environment.
- Execute technical SEO remediation using WP-CLI, staging environments, database audits, and template-level fixes across large site portfolios.
- Develop geo-targeted content systems, conditional rendering, and map integrations to support multi-location visibility and lead generation.
- Configure GA4, GTM, conversion events, phone-click tracking, form-submission tracking, and attribution integrations for marketing performance reporting.
- Lead migrations, launches, and production optimization across hosting environments, covering DNS, SSL, databases, accessibility, browser compatibility, Core Web Vitals, security, and deployment readiness.
- Deliver optimized custom website builds achieving 90+ mobile and 100 desktop PageSpeed scores, along with 100% GTmetrix performance ratings.

Web Application Support & Developer – On call

IT Lasso Inc., Canton, OH — Jun 2022 – Present

- Maintained and supported client web applications across CMS platforms, resolving functional, performance, and environment-related issues.
- Acted as primary technical contact for clients, implementing site updates, feature requests, and structural changes.
- Delivered full-cycle website builds for clients in legal and real estate, from requirements gathering through deployment.
- Troubleshooted hosting, plugin conflicts, and system-level issues to maintain uptime and stability.
- Managed ongoing content and system updates to ensure accuracy and consistent site operation.
- Collaborated with designers and developers to deliver projects on time and within scope.
- Modernized a legacy website through responsive updates and performance optimization, more than doubling mobile and desktop PageSpeed scores.

Web Developer & Project Lead

Crossbridge Marketing & Media, Orrville, OH — Apr 2023 – Feb 2024

- Developed and maintained responsive websites using WordPress and Drupal for client projects.
- Managed 30–40 active client sites, handling updates, deployments, and performance improvements.
- Led full project lifecycle from requirements gathering through launch, coordinating timelines and deliverables.
- Worked directly with clients to define technical requirements and implement site enhancements.
- Managed WooCommerce and e-commerce sites, including product catalog updates, pricing changes, and promotional configurations.
- Implemented on-page SEO improvements (metadata, site structure, image optimization) to support search visibility.
- Deployed websites to production, managing DNS, SSL, and hosting configurations.

WEB APPLICATION PROJECTS

OluOps – AI Agent Operations Platform

Next.js, React, TypeScript, Tailwind CSS, Supabase (PostgreSQL), Vercel, APIs

Live Link: app.oluops.com

Built and deployed OluOps, an AI-powered agency operations agent using Next.js, React, Supabase, and Vercel. Developed a custom WordPress connector that securely synchronizes site health, plugin and theme inventory, PHP and WordPress versions, PageSpeed metrics, security data, and operational alerts across production and staging environments. Implemented AI-assisted diagnostics, approval-gated maintenance workflows, technical SEO reporting, uptime and SSL monitoring, activity logging, prospect research, outreach management, client and hosting records, governance controls, and a website studio for generating, previewing, and exporting responsive website mockups.

CommerceOps

Custom WooCommerce Storefront – WooCommerce, PHP, ACF, editable theme architecture

Live Link: <https://commerceops.oladipolabs.com/>

Built a custom commerce WP theme featuring ACF-managed content and global settings, reusable merchandising sections, tailored product and category templates, responsive navigation and search, and styled cart and checkout experiences. Optimized storefront layouts across desktop and mobile while keeping commerce data native to WooCommerce.
